DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William E. Curry on October 6, 2004.

Cancel claims 13, 15, 16 and 17.

Further amend claim 14 (see amendments dated August 25, 2004);
14. (Currently amended) An apparatus to decrease resonance in a printed circuit board, comprising:

a signal trace line to carry a signal;

a ground plane to connect said signal trace line to a ground;

a cut in said ground plane to increase a transit time of said signal through said ground plane; and

an additional length segment within said signal trace line to increase the transit time of said signal through said signal trace line;

said additional length segment when added to said signal trace line is to increase[s] the transit time at said signal through said signal trace line out of a resonance range.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:

Claims 14, 18 and 19:

Claims 14, 18 and 19, previously objected to in the Office action dated May 19, 2004, have incorporated the subject matter of independent claim 13 (now cancelled).

Pankinaho (best shown in Figs. 12a – 12c) shows a resonant antenna structure comprising a cut in the ground plane (141). Pankinaho further teaches the notch or cut decreasing resonance (col. 8, lines 21-23) where the ground plane is formed on the circuit board (col. 7, lines 24,25), but does not teach the an additional length segment within the signal line to increase the transit time at the signal through the signal trace (claim 14); where the cut terminates more than 10 mils from the signal trace line (claim 18); or where a plurality of cuts are similarly located on the pcb (claim 19).
